Enter your 1 Rep Maxes in the top row, your training maxes will be calculated at 90% of your true max.
Each week, increase your training max if you were able to complete all the reps
You will have to manually enter your new Training Max, which will overwrite the formula (that is okay!)
Assistance work is done with bodybuilding sets/reps, and can be changed to fit your needs

How much you will increase your TM each week is based on how you perform in the 1+ set each day

If you get 0-1 reps, do not increase your TM
If you get 2-3 Reps, increase your TM by 5lb
If you get 4-5 reps, increase your TM 5-10lb
If you get more than 5 Reps, increase your TM by 10-15lb
